RECEIVED
JAN 16 2007
DIV. OF OIL, GAS & MINING

Dear Beth,

In response to our previous communications with you and others of the Utah Department of Natural Resources- Division of Oil, Gas, and mining and also the U. S. Department of the Interior- B. L. M. I, in behalf of Dolomite Stone #1 permit #S/053/050 consisting of a small 5 acre mine site which consisted of approximately 2.5 acres of surface disturbance prior to Dec.8,2006. There remains approximately 1 acre to be reclaimed which I intend to do. It would have been done before the deadline of bonding or reclaiming but because of the extreme forest fire danger and flash flooding which prohibited me from completing it due to access. The B .L. M. road running by my mine site was completely washed out in several places prohibiting any equipment access to my road, which road is less than 1 acre and is the last part of the disturbance needing to be reclaimed.

I now apologize and appeal to your consideration, asking if you would please grant an extension of time in order that I might come into compliance with the requirements. My plan is to coordinate with Mr. Doug Jensen which we have discussed that will take place at the earliest opportunity in April or May of 2007. You may wonder why so long an extension of time request but it is completely dependent upon weather conditions in the mine site area which I have no control over. This area is very remote and difficult to access. I will need to repair the B. L. M. road in several places to enable me to reach my road with the necessary equipment so that I can finish reclaiming my road. Once I reach the mine claim road then I anticipate that I can do the actual reclaiming in one day.

Thank you very much Beth and Mr. Doug Jensen for your very helpful and talented abilities. Looking forward to continuing to work with you. I will keep up the claim, but there will be no activity until a latter date, with a new letter with a notice of intent as required by law.

Sincerely,
Stephen Laub
